## Meet the experts

30 minutes **Expert dialogue** with Frank Thelen and Paul Schmidt.  
The winners are invited to the office in Bonn, alternatively remote.

### About **10xDNA**:

The 10xDNA funds focus on promising, disruptive technologies such as AI and 3D printing. An important part of the research process is the dialogue with industry experts and leading technology companies. For this reason, 10xDNA analyst and 3D printing expert Paul joins the 3DPC jury for the first time this year.
