3D Pioneers Challenge Pushing Boundaries 2019

Apply now to take part in the international competition for **additive manufacturing technologies!**

Already for the fourth time the unique **3D Pioneers Challenge**, as the platform for pioneers in 3D printing, covers a range of verticals and is aimed at designers who are breaking new ground in the field of 3D printing, taking into account the complete value-added system of additive technologies and understand the key trends of the industry. The Challenge seeks to uncover specialists from around the world who are thinking outside the box and - **pushing boundaries**.

Additive manufacturing is one of the innovations of the 21st century. Hardly a day goes by without that this technology surprises with something new. Meanwhile it is part in higher education programs and at technological universities and institutes. 3D printing is standing on the threshold to be integrated into industrial manufacturing processes. For some time now, the technology is not pushing its way to the fore – but as hidden champion, it acts as an „enabler“ of many concepts and innovations, and even of completely new business fields. The needs of humans are in the foreground through individual solutions. Spare parts procurement is being rethought. Last but not least, lightweight construction creates sustainability. Social projects are only made possible by 3D printing in some areas. Pioneer thinking also requires the courage to put it into practice, breaking new ground. The 3DPC is looking for these pioneers who think 3D printing one step further. Where is it enabler, where is it in the main focus?

The competition will focus on the following verticals:

Design
FashionTech
Architecture
Mobility

MedTech
Material
Digital
Sustainability

Entrants

The competition is open to **Students** and **Young Professionals** (companies less than three years experience) and **Professionals** (that have been in the market for more than three years and private limited companies, independent of their date of foundation) – working in design or technical fields, as well as the automotive, software engineering, research and medical sectors, all enthusiasts that use 3D printing.

We welcome submissions from previously published projects to brand new ideas. Group entries are also permitted.

Award

This year the 3D Pioneers Challenge has a total of EUR **35.000** of prize money, kindly supported by the Ministry of Economics, Science and Digital Society Thuringia. Other prizes are awarded by 3DPC partners, such as:

- The MakerBot Replicator Mini+ for the best student project by MakerBotEMEA
- „The 3D Printing Handbook“- technologies, design and applications by 3dhubs
- Online-subscriptions in English or German by „designreport“, the design magazine of the German Design Council,
- „NetFabb Licenses“ and „Fusion 360 Licenses“ by Autodesk

The prize money and other prizes will be awarded across the verticals. The decision is up to the jury.

The finalists' submissions will be exhibited at Rapid.Tech + FabCon 3.D in Erfurt (25th-27th June 2019) at a special area for the 3DPC exhibition.

The exhibition of the finalists will be taken on a **roadshow** on international events.

All finalists will be invited to the 3D Pioneers Challenge award ceremony, which will take place as part of a **gala evening** in Erfurt on 26th June 2019. We would like to have as many finalists as possible to join us at the ceremony. Participants who reach the final round will therefore be informed in advance.

Assessment criteria

The main judging criterion will be how the project deals with current issues and medium- to long-term trends affecting the sector. 3DPC focuses furthermore on interdisciplinary works and the combination of several technologies.

The selected submissions will be presented as **3DPC 2019 Finalists** at the trade show Rapid.Tech + FabCon 3.D in Erfurt.

All submissions will be voted in a non-public, multi-stage selection process.

At a pre-jury panel the jury is taking into consideration the short explanatory film and images with descriptions and justifications of the unique features of the design of each submission to select the finalists for the exhibition. The final jury panel takes place on site whilst RapidTech + FabCon 3.D. The jury decides upon the winners regarding the exhibits at the exhibition and all submitted information in a closed session.

Always based on the following criteria:

Implementation

- Manufactured using additive manufacturing processes
- Design appropriate for the material
- Ecological aspects
- Digital value-added systems

Conception, design

- Conceptual quality (content, novelty, degree of innovation, product definition)
- Design quality (originality, consistent and aesthetic design principle, ergonomics)

Relevance

- Relevance to society (social aspects, purpose)
- Future viability of the idea/project
- How the project engages with state-of-the-art technology/knowledge
- Sustainability

The jury takes into consideration whether the submissions come from Students, Young Professionals or Professionals.

Expert jury

The international, high-class jury is made up of experts who work in this year's verticals.

Jury members 2019

Dr. Justus Bobke_ 3D Druck Verband e.V.
Diana Drewes_ Haute Innovation, Agency for material and technology
Stephan Eelman_ BASF 3D Print Solutions GmbH
Sarah Goehrke_ Additive Integrity LLC
Arno Held_ AM Ventures Holding GmbH
Andrej Kupetz_ German Design Council, Foundation
Ross Lovegrove_ Lovegrove Studio
Silvia Olp_ aed Stuttgart e.V.
Prof. Gilles Retsin_ UCL Bartlett
Prof. Wolfgang Sattler_ Bauhaus University Weimar
Patrik Schumacher_ Zaha Hadid Architects
Dr. Dirk Simon_ FARSOON Europe GmbH
Joachim Stumpp_ raumPROBE oHG
Andreas Velten_ IFA3D Medical Solutions GmbH
Christoph Völcker_ Würth Elektronik eiSos GmbH
Wolf Udo Wagner_ Studio Wagner:Design, DDC
Anouk Wipprecht_ FashionTech Designer

The independent jury will decide how the prize money and prizes will be apportioned.

Entry fees and payment conditions

Entry is free of charge for **Students**, for **Young Professionals** who have completed their studies within the past three years, and for **exhibitors** at the current year's Rapid.Tech + FabCon 3.D. **Professionals** (Companies that have been in the market for more than three years / and private limited companies, independent of their date of foundation) will be charged an entry fee of EUR 250. This does not include VAT.

No other fees will be charged. This also applies to further presentations, documentations and publications.

Timesheet

November 2018
15th March 2019
25th - 27th June 2019

Call for entries open
Submission deadline
Exhibition of the finalists' projects at

following

Registration

The registration is official by handing in the submission at the latest until the deadline for applications by **15th of March 2019**.

No more than three entries may be submitted per person.

Any design that has been published previously must not be older than five years.

Entries that made it to the final exhibition in 3DPC 2016, 2017 and 2018 may not be submitted again.

For the application please open an account (Sign up) at www.3dpc.io

If you already have an account you may submit your new projects for this year there as well. If you have lost your login-data, please write a short email to info@3dpc.io mentioning your username.

Please fill one complete digital online-form for each project and upload for each entry all needed files.

Take care of the right sizes of the files and measurements of the pictures, as the files may not be processed properly.

The uploaded and provided files for your projects will be saved in your account and you are able to update and change the content till the submission deadline (Login). After the deadline the account is closed and no changes possible anymore.

Incomplete applications and submissions can not be considered in the multi-stage jury procedure for the selection of the finalists.

In all further correspondence please mention the name of the **project** as well as your **username**.

Submission

Each submission must contain the following:

In the account

- Completely digitally filled out registration form
- Project description (1000 characters, German/English)
- Short description (150 characters, German/English)

By upload

Please mention in the name of each uploaded file the name of the project.

- where required proof of studies, confirmation of enrolment
- One significant high quality photo/rendering (.jpg 1748 x 2480 px, landscape format, uniform background)
- Producible 3D data file for the submitted design (.stl /.iges /.step)
- A short explanatory movie (max. 60 seconds, if comments needed only as writing in English, likely licence free background music) in two formats :
 - Full HD 3:2 (for display on Ipads at the exhibition)
 - Full HD 16:9 (for display on large screen at the gala event)

If there is an existing model of the project that may be provided for the final exhibition you may send it directly to Messe Erfurt (date will be communicated in time).

Please read the conditions of participation/general terms and conditions carefully.

In case of being part of the final exhibition and there is no existing model, a partner of 3DPC may produce a prototype (free of charge for the participant).

DDC, Deutscher Designer Club.
www.ddc.de

In collaboration with Messe Erfurt, Rapid.Tech + FabCon 3.D. d.sign21 organizes the 3D Pioneers Challenge.

Rapid.Tech + FabCon 3.D is one of Europe's most important events in the field of additive manufacturing. It has been providing information about the status and development of Rapid Prototyping, the direct production of end products by using additive manufacturing as well as the way into series production. With more than 100 user-oriented lectures in the specialist conference and the 3D Printing Conference as well as more than 200 exhibitors on the show floor Rapid.Tech + FabCon 3.D is a high-class industry get-together which is unique in this form. From 25 to 27 June 2019 more than 5,000 international trade visitors and conference participants are expected in Erfurt.

The company for design and consultancy with a wealth of experience in developing and organising design challenges. Its expertise in design, additive technologies and the global network supports the **3D Pioneers Challenge**.

3DPC - the international platform for pioneers in 3d printing. The international competition for additive manufacturing builds the gateway for all enthusiasts who deal with new technologies and use 3d printing to push their projects.

The 3D Pioneers Challenge is under the patronage of the **DDC, Deutscher Designer Club.**

Liability Insurance

The participant bears all costs that are associated with processing the submitted designs - sending and return. The organiser disclaims liability. The objects need to be packed safely and the packaging material must be included. Please no foam packaging peanuts.

General legal conditions

Entrants are responsible for ensuring the rights to their designs are protected and ensuring that the rights of third parties are not breached by their participation in the competition and the publication of the results of the competition in printed documents, exhibitions and press releases. They will provide all required documentation free of charge.

The decision of the jury is final and there is no right of appeal. For further information, please refer to the general terms and conditions.

GDPR

The Data Protection Regulation according to GDPR of Völcker & Völcker GbR can be viewed at any time at www.3dpc.io/en/privacy

General terms and conditions

Conditions of participation

Competition 3D Pioneers Challenge

§1 General

§ 1.1

The general terms and conditions apply to competitions organised by d.sign21. (d.sign21 is the label for Völcker & Völcker GbR, represented by the Managing Director Dipl.-Ing. (FH), M.A. Simone Völcker, and Managing Director Dipl.-Ing. (FH), M.A. Christoph Völcker, Fronhof 1, 70378 Stuttgart, Germany. Email: info(at)d-sign21.de. Telephone: +49 711 477 2748-0.) d.sign21 is hereinafter referred to as the "Organiser".

Messe Erfurt GmbH, represented by the CEO Michael Kynast, is the exclusive licensee for the 3D Pioneers Challenge and hosts the competition at the Rapid.Tech + FabCon 3.D. (Messe Erfurt GmbH, Gothaer Straße 34, 99094 Erfurt, Germany, Email info(at)messe-erfurt.de. Telephone: + 49 361 400-0) Messe Erfurt GmbH is hereinafter referred to as the "Promoter".

§1.2

Participation is subject to the present terms and conditions. By participating in the 3D Pioneers Challenge competition, participants recognize the conditions of participation as binding.

§1.3

With the registration at www.3dpc.io the participant accepts the General Business Terms and conditions of participation as well as the General Data Protection Regulation GDPR of Völcker & Völcker GbR .

§1.4

Participation takes place exclusively online on the internet. The formalities are available for download from the website www.3dpc.io.

§2 Competition

The 3D Pioneers Challenge seeks to discover specialists from around the world who are thinking outside the box and pushing boundaries. The final decision is based in large part on a consideration of current issues as well as medium- and long-term trends that link new technologies and provide practical applications, integrate them into existing processes, taking into account the complete value-added system or create forward-looking concepts.

The focus is on "verticals", that means on all major disciplines that use 3D printing and that are leading the way in additive manufacturing. Prize money and various prizes are awarded annually. For a more detailed description of the disciplines, see the registration documents and formalities as well as § 4.2.

§3 Entrants

§3.1

Students in the design, architecture, fashion, medical, automotive, research, construction, engineering, digital media and technology fields, as well as professional firms, are invited. Anything can be submitted, from projects that have already been publicised to brand new ideas.

Group entries are also permitted.

Students and Young Professionals are participants that are less than 3 years away from their studies or education. Professionals are more than three years on the market or private limited companies independent of their date of foundation. (corresponding participation fees see §7)

§3.2

For cooperative and team submissions, a main contact person must be named as a primary contact within the application form for further correspondence.

§3.3

Please take care that with the name of member and institution are given differently to avoid confusion.

Institution means: University, Office, Research institution, Company

Member name means: Contact person, participant.

§4 Jury

§4.1

The independent jury is assembled annually and consists of experts in the respective verticals.

The non-public, multi-stage selection process takes place after the submission deadline as well as finally during the promoter's exhibition event.

Any member of the jury directly involved with a submitted entry will not be allowed to vote for this submission.

§4.2

The evaluation is carried out according to the following criteria:

Implementation

- Manufactured using additive manufacturing processes
- Design appropriate for the material
- Ecological aspects
- Digital value-added systems

Conception, design

- Conceptual quality (content, novelty, degree of innovation, product definition)
- Design quality (originality, consistent and aesthetic design principle, ergonomics)

Relevance

- Social relevance (meaning, social aspects)
- Future viability of the idea/project
- How the project engages with state-of-the-art technology/knowledge
- Sustainability

The evaluation criteria may be adjusted annually – they should be consulted in the respective application documents.

§4.3

The jury will decide how to weight the criteria in particular.

The independent jury alone will decide only in the final jury panel which project will receive which prize, in which category. The decision of the jury is final and there is no right of appeal.

§5 Award

§5.1

The finalists (best submissions, selected in the multi-stage jury procedure) will be presented in a special exhibition at Rapid.Tech + FabCon 3.D trade show.

§5.2

Submissions that have not been already produced may be produced for the exhibition by the partners of the competition free of charge for the entrant. After that and the roadshow (§9) the object may be returned to the participants against a shipping fee. Participants must state their interest in this option at the time of registration.

If there is an existing model of the project that may be provided for the final exhibition you should send it directly to Messe Erfurt (date will be communicated in time).

§5.3

The best submissions will be awarded as winners with prize-money and special prizes. The amount and type of the prizes is published annually in the tender documents and/or on the homepage and/or facebook.

§5.4

All finalists will be invited to the 3D Pioneers Challenge award ceremony, which will take place as part of a gala evening. Finalists are invited and encouraged to attend the award ceremony at their own expense. The organiser directly notifies the finalists of their participation in the final exhibition, by means of an announcement which includes an invitation to the award ceremony and a request to register.

§5.5

All submissions that are presented in the final exhibition will be part in the roadshow that will take place after the fair. (See § 9)

§6 Registration and Conclusion of the Agreement

§6.1

Registration takes place and the contractual agreement is concluded with the timely submission of materials latest till the deadline. For each submission, this includes a completely filled registration form including all relevant documents and information, that may be uploaded in the account by the participant.

Incomplete applications and submissions can not be considered in the multi-stage jury procedure for the selection of finalists. By adding a project (my projects) you are legally obliged to pay participation fees that might appear (see §7).

See the application documents, formalities for further details.

§6.2

A submission may not be older than 5 years at the time of the submission deadline.
3DPC entries that made it to the 3DPC final exhibition in former years may not be submitted again.

§6.3

For the registration the participant creates an account at www.3dpc.io. There he may submit up to three projects, upload pictures, movies, describing texts. The files will be saved in the account and the participant is able to update the content till the submission deadline. After the deadline it is not possible anymore.

§6.4

Each participant may enter a maximum of 3 submissions.
Each submission requires to be submitted separately at „my projects“ in the account.

§6.5

Printable, producible data for the respective additive processes are expressly required for participation. They are necessary for a smooth expiry of the exhibition planning and securing of the exhibits.

§6.6

The participant is required to declare his group of participants (§ 3):

- „Student“ / „Young Professional“ / „Exhibitor of Rapid.Tech + FabCon 3.D“ - These are free of charge. Proofs must be handed in by upload in the content of the personal account.

- By declaring „Professional“ the participant accepts the participation fee and has to pay the fee after receiving the bill.

§6.7

The approved languages are German and English.

§6.8

The submission deadline is the final deadline. Late registrations will not be allowed.

For applications that require a participation fee (see §7), the fees are independent of whether the entry is selected for the final or not, so obligatory. Payments must be made even in the case of withdrawal (see §13). There is no right of appeal.

§6.9

If third parties show interest in getting in contact with the participant, the organiser will act as agent and will lead the contact of the interested third party to the entrant. Only for this purpose all contact data will be archived in a database unlimited and will not be handed to other third parties. For publications, presentations, archives or similar use, the organiser may use the provided pictures, movies and descriptions unlimited by linking to the participant.

§6.10

The entrant gives its consent to receive newsletters with the registration at www.3dpc.io. This complies to the German Data protection laws. You may stop the newsletter by sending an email with : "End newsletter". see also GDPR.

§7 Participation Fees and Payment Conditions

§7.1

Students and Young Professionals whose studies or training ended less than 3 years ago, as well as Rapid.Tech + FabCon 3.D exhibitors for the current year, pay no fees. Professionals (more than 3 years on the market) and private limited companies (independent of their date of foundation) pay the participation fees in accordance with the application documents plus the current statutory value-added tax.

The participation fees may vary for each year and will be published in the current registration documents/formalities.

§7.2

The entrant receives the invoice at the latest after the submission deadline. The participation fees are to be transferred to the account specified in the invoice within 10 days of receipt of the invoice, without deduction. This is a condition for participation in the competition, the fees are independent of whether the entry is selected for the final or not, so obligatory. The participant is excluded from participation if the payment is made later.

§7.3

Registration fees are refundable or don't appear only if the participant's cancellation is received in time within 14 days in written form. (see §13)

§7.4

The participant bears all costs that are associated with processing the submitted designs (modell) - sending and return. The organiser disclaims liability. Proper and save packaging has to be planned and provided by the participant. Please no foam packaging peanuts.

§7.5

No further costs arise for the participants. This also applies to further presentations, documentations and publications.

§8 Public Relations

§8.1

The newsletter relates to application documents, results of the competition and roadshow stops as well as projects and topics concerning the 3DPC. Registered participants as well as subscribers of the newsletter accept the GDPR (see §1.3)

§8.2

The exhibition of 3D Pioneers Challenge finalists for the current year takes place at Rapid.Tech + FabCon 3.D for the respective year.

§8.3

The details and results of the competition are presented and published as part of Rapid.Tech + FabCon 3.D for the current year and by the organiser via press materials (digital and print).

Furthermore, the organiser may use and publish the information and results of the competition for other printed media and digital media in an unlimited manner.

Not affected are personal contact details and the provided 3D print data. These are only used as part of the ongoing competition for its organization when necessary for cooperating partners, but will not be disclosed to third parties.

Press materials will be made available to cooperation partners, participants and the press. Copyright is held by the organiser, and reproduction is permitted only by arrangement.

§9 Roadshow

§9.1

Several roadshow stops will be organised where the exhibits of the finalists will be presented on international events. The exhibit or an adequate alternative may be in charge of the organiser for around one year. The organiser informs about the planned roadshow details and/or announces them on Newsletter / website / facebook if applicable.

§9.2

Generally, the finalists may ask for their exhibit any time for own purposes in agreement. Please inform 3DPC in time regarding organisation and transportation time as well as to avoid overlapping of exhibitions.. It will be decided when the exhibit needs to be back at 3DPC individually. Transportation costs are taken by the participant.

§9.3

The selection of the exhibits will be decided in cooperation with the organisation/fair, where 3DPC may present. The host may also name favourites. The aim is to make it equal for all winners and special mention.

As there will be contracts with the hosts, they also may select.

There is no right neither that the projects will be presented nor that you may attend the events in person.

§9.4

The exhibits are securely and insured stored in the office of d.sign21, the headquarter of 3DPC from where the roadshow will be coordinated. The exhibits are insured whilst the roadshow.

If an object needs to be sent home in between the roadshow and back to the headquarter, the insurance of the sending depends on the selected way of sending. As described in the general terms and conditions, which was accepted with the participation of the challenge, the costs for logistics and insurance are taken by the participant.

The objects will be packed in the material given by the owner (if available). Therefore the designer is responsible for the security of the packaging. A documentation with pictures about how to repack will be helpful and the organiser asks the participant to hand in such a documentation. Necessary special tools for packing and protecting have to be provided by the participant.

Whilst the exhibition the objects will be under surveillance of staff if available.

§10 Liability / Insurance

The participant bears all costs that are associated with processing the submitted designs - sending and return. The package needs to be securely packed for the transportation by the participant. The organiser disclaims liability.

§11 General Legal Conditions

§11.1

Participants are responsible for ensuring the rights to their designs are protected and ensuring that the rights of third parties are not breached by their participation in the competition and the publication of the results of the competition in printed documents, online media, exhibitions and press releases. They will provide all required documentation free of charge.

The organiser, promoter, cooperation partners and jurors of the competition are exempted by the participant from all claims, demands and rights of third parties in the case of an alleged infringement. Any damages that arise will be borne by the participant.

§11.2

The entrant owns the copy right of its submissions.

The participant grants the organiser unlimited usage, disposition, patent rights and archiving (see § 6.8, §8.2), within the framework of the competition and its public relations, for the data, texts, films and images provided in the submission.

§11.3

In addition, cooperation partners can inform the organiser of their interest to enter into further partnerships with the participants. The organiser is the coordinator and mediator. Consent regarding implementation is the responsibility of the participant. By registering, participants agree to this. By agreeing to cooperate on the 3D Pioneers Challenge, cooperation partners have given their consent.

§11.4

Submissions that are already present on the market remain unaffected. Rights thereto are reserved by the participants and their partners. This must be indicated separately at the time of registration and be accompanied by appropriate evidence.

§11.5

The winners may use the award indefinitely for their own communication purposes. The organiser will also show the prize-winning designs at further exhibitions to the extent that this fits conceptually with the respective presentations/events.

§11.6

Should the rights of a third party be infringed, the promoter, organiser and jurors reserve the right to revoke the award.

§12 Reservations

§12.1

Provided that the promoter and organiser together have not secured the economic viability or other good reasons such as acts of God occur, the organiser reserves the right to cancel the competition.

§12.2

This agreement remains valid if the actual competition is postponed. If the actual competition is cancelled, the contractual partners are freed from all obligations without any right to assert claims for reimbursement of costs or damages.

§13 Withdrawal

The participant may withdraw from his/her registration within 14 days before application deadline. The withdrawal must be declared in writing. Should payment already have been made by the participant to the organiser within the 14 days, it will be refunded to the participant in the event of a timely withdrawal. After 14 days as well as with the deadline, withdrawal of the participant and a refund of the associated fees are excluded. A request to delete the personal contact data according to GDPR must also be made in writing.

§14 Confidentiality

Participants, cooperation partners, jurors as well as the promoter and organiser agree to maintain confidentiality about the submissions during the processing and evaluation period. This applies to all exhibited, winning and featured designs until the day of the opening of the exhibition in the current year.

§15 Place of Performance and Place of Jurisdiction

§15.1

The exclusive place of performance and place of jurisdiction for the agreement is the business headquarters of the organiser; this also applies if the participant resides abroad.

§15.2

As soon as the promoter or organiser is made aware by legal judgement or court decision that third-party rights were violated by the submission, the participant may be excluded or the award revoked.

§15.3

Any claims must be made in writing.

§16 Severability Clause

Should any individual provisions of this agreement be or become ineffective, the effectiveness of the contract as a whole shall not be affected thereby. In such a case, a provision which comes as close as possible to the content of the original provision shall take the place of the non-included or ineffective provision.

§17 Miscellaneous

By participating in the competition, participants confirm their acceptance of the general legal conditions described above and the information regarding liability and insurance. With the registration for the competition, the participants make a legally binding declaration to adhere to the terms of the competition. The jury's decision is final. There is no right of appeal. Subject to change. The invitations to the gala evening will be given in order of priority to the winners and finalists and then by registration order. Places are limited.

Private Policy

Declaration of agreement General Data Protection Regulation GDPR

On 25 May 2018 General Data Protection Regulation GDPR started. This will significantly strengthen the data protection of persons affected in the European Union with the result that the relationship between us as the award organizer and you will also have to be restructured.

In accordance with Art. 6 Para. 1 a GDPR, the participant agrees that Völcker & Völcker GbR may process data provided by the participant for 3DPC for the purpose of press information, invitations and correspondence conducting the competition. The Data Protection Regulation according to GDPR of Völcker & Völcker GbR can be viewed at any time at www.3dpc.io/en/privacy.

Any consent given can be revoked at any time in writing. Please note that the revocation will only take effect for future campaigns. Processing that took place before the revocation is not affected by this.

For any questions please don't hesitate to contact
